What are AI Agents?

AI Agents are smart digital helpers that use language models and tools to get things done. They understand what you ask, decide what to do and take action.

You'll find them across apps, helping teams automate task, support customers, and work smarter.

Curious how the magic happens?

Lets Go →

What should your agent do?

Imagine you've built an agent to help with an online service. Someone messages to reset their password.

A

Wait for a human to respond

B

Instantly send a secure reset link

C

Ask the person to try again later
